fix

Priority fixes

1. Text with too little contrast

Accessibility · serious

Elements must meet minimum color contrast ratio thresholds

.text-white\45 (contrast 4.48:1, needs 4.5:1)

Fix: Raise text contrast to WCAG AA (4.5:1 body, 3:1 large text). in \$299 quick fix

Source: axe-core · seen on desktop

2. Visible label differs from accessible name

Accessibility · serious

Elements must have their visible text as part of their accessible name

a[href\$="#top"]

Fix: Elements must have their visible text as part of their accessible name in \$299 quick fix

Source: axe-core · seen on desktop

3. Undersized functional text

Design quality · warning · ×4

Interactive and content-bearing UI text (links, buttons, nav items, labels, table cells, meta rows, timecodes) below 11px is a legibility failure, not a style choice.

9px functional text "AI Try-On" (below 11px floor)

9px functional text "AI Try-On" (below 10px floor)

Fix: Raise button/label text to at least 14px so controls are readable and tappable.

in \$299 quick fix

Source: Impeccable · seen on desktop + mobile

4. Slow on mobile (Performance 52/100)

Performance · serious

Most launch traffic is mobile; LCP over 2.5s loses visitors.

LCP 5.1s, TBT 824ms, CLS 0.002

Reduce unused CSS (~0.5s)

Reduce unused JavaScript (~0.5s)

Fix: Compress/resize hero images (WebP/AVIF), lazy-load below the fold, split the JS bundle, preload the main font. in \$299 quick fix

Source: Lighthouse · seen on mobile (simulated 4G)

5. AI color palette

AI-template tell · warning · ×2

Purple/violet gradients and cyan-on-dark are the most recognizable tells of AI-generated UIs.

Purple/violet gradient background

Fix: Replace the default purple/indigo-to-blue AI palette with brand colours. polish sprint

Source: Impeccable · seen on desktop + mobile

6. Tap targets smaller than 24px on mobile

Mobile · moderate · ×9

WCAG 2.2 target size minimum is 24×24px; Apple recommends 44pt.

See real results (101×20px)

FAQ (28×20px)

Try-On Guide (84×20px)

Fix: Pad links/icons to at least 44×44px hit areas. in \$299 quick fix

Source: Shipshape check · seen on mobile 390px

7. Line length too long

Design quality · warning · ×5

Text lines wider than ~80 characters are hard to read.

~192 chars/line (aim for <80)

~90 chars/line (aim for <80)

Fix: Cap paragraph width at ~65–75ch (max-width: 68ch) so lines are easy to track.

in \$299 quick fix

Source: Impeccable · seen on desktop

8. Crushed letter spacing

AI-template tell · warning · ×3

Letter-spacing pulled tighter than the point where characters keep their own shapes costs legibility.

letter-spacing: -0.05em – "See the outfit on you before you buy."

letter-spacing: -0.05em – "Try it on before it arrives at your door"

Fix: Loosen headline letter-spacing (no tighter than about -0.02em).

Before / after preview

The "after" images were made by applying CSS changes in a local browser only. Nothing on the live site was changed.

Dashed boxes mark the changed elements: red is now, green is fixed. These are the mechanical fixes (contrast, line-height, line length). The paid fix also covers changes that need a person: layout, type and copy.

Now (iPhone width, 390px)

After the mechanical fixes (contrast on 2 elements)

Now (desktop, 1440px)

After (contrast on 2 elements, line length on 3)

Where the accessibility issues are

Numbered boxes mark elements that axe-core flagged.

#	Issue	Element
1	Elements must meet minimum color contrast ratio thresholds	.text-white\45
2	Elements must have their visible text as part of their accessible name	a[href\$="#top"]

AI TRY-ON FOR IPHONE

See the outfit on you before you buy.

Add one photo of you and a garment. Style My Look shows you wearing it from the front, the side and the back.

See real results

Free to download. New accounts get 3 starter credits. A try-on costs 2.

Real result from the app: front, side, back

Brown coat from a

HOW IT WORKS

A photo, a link, three views.

1. Add your photo

Pick a clear photo of yourself from the camera or your library.

2. Paste a product link

Paste a link from a store that imports, such as Mango. If a store will not import, such as Zara, add the garment photo instead.

3. See three views

Get the outfit on you from the front, the side and the back. Save it to your Lookbook or share it.

[Read the full guide to trying on clothes from a product link](#)

REAL RESULTS

What the app gives you back.

These are unedited result images from the app. Each one shows the front, side and back view.

Brown belted coat, from a Mango product link

Biggest mobile speed wins (Lighthouse)

- Reduce unused CSS: about 0.5s
- Reduce unused JavaScript: about 0.5s

What fixing it looks like

\$299

Quick fix, 48h

Everything tagged "quick fix" above, sent as one PR or patch to your repo (Lovable/Bolt/v0 export or GitHub). Re-audit report included.

\$900–1,500

Polish sprint, 3–5 days

Quick fix plus type scale, spacing rhythm, palette and copy pass to remove the template look, plus mobile layout fixes. Before/after report included.

How this was checked

Automated, read-only checks on the public page on 9 Oct 2026: Impeccable 4.1.0 (59 deterministic rules, no LLM) at 1280px and 390px; axe-core 4.14.0 (WCAG 2.1 A/AA + best practice); Google Lighthouse 13.5 (mobile, simulated throttling); plus Shipshape checks for sideways scroll, tap targets, share/SEO metadata and console errors. Automated tools find a subset of issues. A clean result here does not mean the site is accessible or polished. Scores move between runs, Lighthouse performance especially. Prepared by Dor Avidan · avidandor@gmail.com · <https://doravidan.github.io/shipshape-audit/>.
